EMERGENCY MANAGEMENT PLAN

In the event of an emergency requiring evacuation of the park, please note the following:

- Management will determine the safest method of evacuation and provide direction using whatever resources are necessary and available.

1. In the event of an emergency, protection of life is the number one priority. Always consider the safety of yourself and others.
2. Main Assembly Area is the Beach in case of Gas or Fire Emergencies (see area shown on park plan).
3. Secondary Assembly Area is on the BBQ AREA for Flood Emergencies (see area shown on park plan).
4. Look for direction from Park Management.
5. Management will decide whether to evacuate by foot or by vehicle.
6. Fire extinguishers are located on the waterway's walls of both amenities buildings and the main office verandas. Extinguishers are located outside and fire blankets inside of all cabins.
7. The boom gate will be placed in the 'up' position.
